NEW JERSEY PEACH COUNCIL, INC.

New Brunswick, New Jersey

FALL, 1959

- - -

SPRING, 1960

EARLY VARIETIES

MAYBELLE (N. J. 164)

A medium to large, white-fleshed semi-clingstone of good quality ripening a few days before Sunrise.

COLLINS (N. J. 200)

A firm, attractive, high quality, yellow-fleshed peach of medium size ripening a few days before Sunrise. A semi-cling when picked at maximum shipping condition. It is a freestone when fully mature. It has developed practically no fruit with split pits. It is one of the most productive early varieties ever developed at the New Jersey Agricultural Experiment Station. The original tree has produced six heavy crops in succession. It is an ideal variety to start the New Jersey peach season.

SUNRISE (N. J. 133)

An attractive, yellow-fleshed peach of medium size ripening a few days after Collins. It is firm and almost a freestone when ripe.

CHERRYRED (N. J. 129)

A large, round, non-melting, yellow-fleshed, clingstone which ripens a few days before Red Bird.

EARLY EAST (N. J. 134)

A yellow-fleshed, semi-cling of medium size and good quality ripening a few days after Sunrise.

JERSEYLAND (N. J. 135)

This large, firm, attractive yellow-fleshed freestone ripens a week before Golden Jubilee. It is productive, hangs well to the tree, and is an excellent shipper.

RARITAN ROSE (N. J. 97)

A firm, attractive, white-fleshed freestone of good quality, ripening a few days before Golden Jubilee. The best early white for the roadside trade.

WILDROSE (N. J. 118)

The best white-fleshed freestone to follow Raritan Rose. The fruit is large, round oval, well colored with red, and has a clear white flesh of high quality.

GOLDGEM (N. J. 197)

A large, yellow-fleshed peach that ripens at the same time as Golden Jubilee. It is much firmer and more attractive than Jubilee, resembling Newday in that respect. It is not a solid red peach like Redhaven, but is easier to grow and under average conditions is larger and more productive. It is recommended as a variety for harvesting and marketing between Jerseyland and Triogem.

TRIOGEM (N. J. 70)

A firm, yellow-fleshed freestone of high quality, ripening a few days later than Golden Jubilee. Very attractive and a good shipper.

NEWDAY (N. J. 79)

A firm, bright, attractive, yellow-fleshed peach of good quality, ripening with Triogem. It is easier to grow than Triogem.

SUNHIGH (N. J. 82)

A large, firm, attractive, yellow-fleshed variety of good quality ripening a few days earlier than Goldeneast. A very popular commercial variety.

SUMMERQUEEN (N. J. 157)

A large, attractive, firm, yellow-fleshed peach of excellent quality ripening about with Sunhigh and just before Goldeneast. It appears to be less susceptible to bacterial spot than Sunhigh. It has large, showy blossoms and the trees set more fruit buds than Sunhigh, but it requires cross pollination.

REDROSE (N. J. 98)

A firm, highly colored, white-fleshed freestone of high quality ripening with Goldeneast. The trees are vigorous, productive, and hardy.

MID-SEASON VARIETIES

GOLDENEAST (N. J. 87)

A large, firm, attractive, yellow-fleshed freestone of high quality ripening about two weeks before Elberta.

SUMMERROSE (N. J. 101)

A large, oval, white-fleshed freestone ripening after Redrose.

SUMMERCREST (N. J. 94)

A yellow-fleshed freestone of high quality ripening just before Elberta. A popular home canning peach.

M. A. BLAKE (N. J. 117)

A firm, bright, yellow-fleshed freestone of good quality. The harvesting season starts about one week before Elberta, and continues well into the Elberta season. The fruit remains firm and hangs to the tree after it becomes highly colored. It is rapidly replacing Elberta in many New Jersey orchards, because of the strong demand for it on the market. An excellent variety for home canning.

WHITE HALE (N. J. 63)

A large to very large, white-fleshed freestone of good quality ripening with J. H. Hale. The tree is more vigorous than J. H. Hale. It meets the demand for a large, showy, white-fleshed peach during the Elberta season.

LATE VARIETIES — AFTER ELBERTA

AFTERGLOW (N. J. 84)

A large, high quality, yellow-fleshed freestone ripening immediately after Elberta. The trees are vigorous, hardy, and productive.

LATEROSE (N. J. 109)

This is a white-fleshed freestone of good quality, ripening a few days after Elberta. Hardy, productive and attractive.

CONSTITUTION (N. J. 161)

A large, yellow-fleshed, freestone of high quality ripening a week to ten days after Elberta.

FALLATE (N. J. 183)

An attractive, white-fleshed freestone peach of high quality and good size, ripening a week to ten days after Elberta.

AUTUMN (N. J. 145)

A late, large, yellow freestone, ripening fully ten to fourteen days after Elberta. Later than Rio-Oso-Gem.

FROSTQUEEN (N. J. 185)

A white-fleshed, freestone peach ripening about a week after Fallate, and at least two weeks after Elberta.

NECTARINES

NECTAROSE (N. J. 9)

A large, white-fleshed freestone, ripening just before Garden State, or about with the Sunhigh peach.

GARDEN STATE

A large, firm, yellow-fleshed freestone of high quality ripening with the Goldeneast peach. It is very desirable for slicing, canning, and freezing.

NECTAHEART (N. J. 10)

A large, white-fleshed freestone completely shaded with red, ripening immediately after Garden State.

NECTACREST (N. J. 8)

This large, attractive, white-fleshed freestone, usually ripens with the Summercrest peach at New Brunswick or about one week after Nectaheart.

NECTALATE (N. J. 4)

A large, firm, white-fleshed nectarine ripening after Elberta, or about with the Afterglow peach.

NEW JERSEY PEACH COUNCIL RECOMMENDED GRADES AND PRICES FALL 1959 — SPRING 1960

(Subject to change without notice.)

<i>Grade</i>	<i>1 to 9 trees</i>	<i>10 to 24 trees</i>	<i>25 to 99 trees</i>	<i>100 to 249 trees</i>	<i>250 to 499 trees</i>	<i>500 trees and up</i>

5 to 6 feet.....	2.25	2.00	1.50	1.00	—	—

Trees may be secured at the C. H. Steelman Fruit Nursery on the Clarks-ville-Port Mercer Road, about one-quarter mile from State Highway Route 1. Telephone WALnut 4-2525. Small shipments to distant points, including all orders for less than 25 trees, will be sent by express collect unless otherwise specified on the order blank.

PLACING ORDERS

All orders for trees should be sent to the New Jersey Peach Council, Inc., R. D. No. 3, Princeton, New Jersey. Orders for Fall delivery will receive first consideration.

A deposit equal to 10 per cent of the total cost of the trees is required with each order and the balance before delivery.
